

Adding whole thousands (multiple terms)

Addition Practice Worksheet

Find the sums.

$7,000 + 4,000 + 6,000 = \underline{\hspace{2cm}}$

$6,000 + 8,000 = \underline{\hspace{2cm}}$

$3,000 + 2,000 + 2,000 = \underline{\hspace{2cm}}$

$4,000 + 6,000 + 7,000 + 2,000 = \underline{\hspace{2cm}}$

$2,000 + 3,000 + 9,000 = \underline{\hspace{2cm}}$

$8,000 + 3,000 = \underline{\hspace{2cm}}$

$3,000 + 8,000 + 3,000 + 2,000 = \underline{\hspace{2cm}}$

$9,000 + 6,000 + 4,000 = \underline{\hspace{2cm}}$

$4,000 + 4,000 = \underline{\hspace{2cm}}$

$1,000 + 9,000 + 8,000 = \underline{\hspace{2cm}}$

$9,000 + 6,000 + 5,000 + 7,000 = \underline{\hspace{2cm}}$

$8,000 + 7,000 = \underline{\hspace{2cm}}$

$6,000 + 4,000 = \underline{\hspace{2cm}}$

$7,000 + 1,000 + 1,000 + 7,000 = \underline{\hspace{2cm}}$

$2,000 + 8,000 = \underline{\hspace{2cm}}$

$2,000 + 8,000 + 3,000 + 3,000 = \underline{\hspace{2cm}}$

Adding whole thousands (multiple terms)

Addition Practice Worksheet

Find the sums.

$$7,000 + 4,000 + 6,000 = \underline{17,000}$$

$$6,000 + 8,000 = \underline{14,000}$$

$$3,000 + 2,000 + 2,000 = \underline{7,000}$$

$$4,000 + 6,000 + 7,000 + 2,000 = \underline{19,000}$$

$$2,000 + 3,000 + 9,000 = \underline{14,000}$$

$$8,000 + 3,000 = \underline{11,000}$$

$$3,000 + 8,000 + 3,000 + 2,000 = \underline{16,000}$$

$$9,000 + 6,000 + 4,000 = \underline{19,000}$$

$$4,000 + 4,000 = \underline{8,000}$$

$$1,000 + 9,000 + 8,000 = \underline{18,000}$$

$$9,000 + 6,000 + 5,000 + 7,000 = \underline{27,000}$$

$$8,000 + 7,000 = \underline{15,000}$$

$$6,000 + 4,000 = \underline{10,000}$$

$$7,000 + 1,000 + 1,000 + 7,000 = \underline{16,000}$$

$$2,000 + 8,000 = \underline{10,000}$$

$$2,000 + 8,000 + 3,000 + 3,000 = \underline{16,000}$$
