Addition

Grade 2 Word Problems Worksheet

A new movie theatre just opened downtown. In the theatre, there are three auditoriums and a concession stand.

1. There are 42 seats in one auditorium and 45 in the other. In each auditorium, there are 3 extra seats at the back for disabled persons. How many seats are there in total?

2. The first show on Sunday is at 11 a.m. The first cashier sold 28 tickets and second cashier sold 13 tickets. Together with the 41 tickets sold online, how many tickets were sold?

3. There are 42 cups of popcorn in the first popcorn machine and 36 cups of popcorn in the second popcorn machine. There are 20 empty popcorn cups. How many cups of popcorn are ready in total?

4. At the soda dispenser, there are 31 large paper cups, 23 medium paper cups and 12 small paper cups. How many paper cups are there in total?

5. There are 32 candy bars and 16 juice boxes at the concession stand. There are two boxes of candy bars in the storage room. If each box contains 24 candy bars, how many candy bars are there in total?

6. Write the addition sentence that fits this: "Three staff members work at the concession stand and two staff members do the cleaning. Together with 2 cashiers and 2 ushers, there are 9 staff working at the theatre now."

Answers

1. 42 + 45 + 3 + 3 = 93
   There are 93 seats in total.

2. 28 + 13 + 41 = 82
   There are 82 tickets sold.

3. 42 + 36 = 78
   78 − 20 = 58
   58 cups of popcorn are ready.

4. 31 + 23 + 12 = 66
   There are 66 paper cups in total.

5. 32 + 24 + 24 = 80
   There are 80 candy bars in total.

6. 3 + 2 + 2 + 2 = 9
