

Identifying types of change

Grade 2 Science Worksheet

Write weathering, erosion, or deposition.

Rain washes soil away from a farm field. _____

Waves add sand to a beach. _____

Bits of dirt fall to the bottom of a lake. _____

Plant roots grow into a crack and break apart a rock. _____

Glaciers slowly wear away rocks as they move. _____

Part of a cliff falls into the sea. _____

Waves tumble rocks until they are round and smooth. _____

Mud and rocks roll down a hill in a landslide. _____

Water in a rock freezes and expands, cracking the rock. _____

A river slows down and drops soil to form a delta. _____

Answers

Rain washes soil away from a farm field.

erosion

Waves add sand to a beach.

deposition

Bits of dirt fall to the bottom of a lake.

deposition

Plant roots grow into a crack and break apart a rock.

weathering

Glaciers slowly wear away rocks as they move.

weathering

Part of a cliff falls into the sea.

erosion

Waves tumble rocks until they are round and smooth.

weathering

Mud and rocks roll down a hill in a landslide.

erosion

Water in a rock freezes and expands, cracking the rock.

weathering

A river slows down and drops soil to form a delta.

deposition
