

Humans cause change

Grade 2 Science Worksheet

For each change, write natural or human-caused.

A dam stops a river from flowing and forms a lake.

An earthquake causes big rocks to fall.

The wind blows sand into large sand dunes.

All the trees on a hillside are cut down.

Large areas are cleared of plants to make space for farming.

Canals are built to bring water to dry desert areas.

A river weathers cliffs into canyons.

Answers

A dam stops a river from flowing and forms a lake.

human-caused

An earthquake causes big rocks to fall.

natural

The wind blows sand into large sand dunes.

natural

All the trees on a hillside are cut down.

human-caused

Large areas are cleared of plants to make space for farming.

human-caused

Canals are built to bring water to dry desert areas.

human-caused

A river weathers cliffs into canyons.

natural
