

Add/Subtract/Multiply w/ parenthesis - 6 numbers

Grade 4 Order of Operations Worksheet

Solve the following.

$1) 2 + 23 + 18 \times 3 - (18 + 29) = \underline{\hspace{2cm}}$

$2) 8 \times 9 - 2 + 5 \times (21 - 13) = \underline{\hspace{2cm}}$

$3) 8 \times (9 - 2) + 5 \times (21 - 13) = \underline{\hspace{2cm}}$

$4) 8 \times 9 - 2 + 5 \times 21 - 13 = \underline{\hspace{2cm}}$

$5) 3 \times (10 + 20) - 3 \times (24 - 11) = \underline{\hspace{2cm}}$

$6) 12 \times (11 - 3 - 5) - (11 + 8) = \underline{\hspace{2cm}}$

$7) 11 \times 3 \times 4 - (7 + 19 + 21) = \underline{\hspace{2cm}}$

$8) (15 - 9) \times 20 + 2 - (2 + 8) = \underline{\hspace{2cm}}$

$9) 40 \times 5 - (21 + 7 + 28 + 19) = \underline{\hspace{2cm}}$

$10) 16 \times (23 - 18) - (19 - 17) + 3 = \underline{\hspace{2cm}}$

Add/Subtract/Multiply w/ parenthesis - 6 numbers

Grade 4 Order of Operations Worksheet

Solve the following.

$$1) \quad 2 + 23 + 18 \times 3 - (18 + 29) = 32$$

$$2) \quad 8 \times 9 - 2 + 5 \times (21 - 13) = 110$$

$$3) \quad 8 \times (9 - 2) + 5 \times (21 - 13) = 96$$

$$4) \quad 8 \times 9 - 2 + 5 \times 21 - 13 = 162$$

$$5) \quad 3 \times (10 + 20) - 3 \times (24 - 11) = 51$$

$$6) \quad 12 \times (11 - 3 - 5) - (11 + 8) = 17$$

$$7) \quad 11 \times 3 \times 4 - (7 + 19 + 21) = 85$$

$$8) \quad (15 - 9) \times 20 + 2 - (2 + 8) = 112$$

$$9) \quad 40 \times 5 - (21 + 7 + 28 + 19) = 125$$

$$10) \quad 16 \times (23 - 18) - (19 - 17) + 3 = 81$$
