

Dividing integers

Grade 5 Integers Worksheet

Rule:

The quotient of two numbers with same signs is a positive number.

The quotient of two numbers with different signs is a negative number.

Find the quotients.

$1) -18 \div 2 =$

$11) -210 \div 6 =$

$2) -72 \div 12 =$

$12) -144 \div 12 =$

$3) -220 \div 20 =$

$13) 92 \div 2 =$

$4) 120 \div (-20) =$

$14) 190 \div (-10) =$

$5) -45 \div (-15) =$

$15) 133 \div 19 =$

$6) -96 \div 16 =$

$16) 42 \div (-3) =$

$7) -180 \div (-9) =$

$17) 171 \div 1 =$

$8) 112 \div 7 =$

$18) 112 \div (-16) =$

$9) 209 \div (-19) =$

$19) -36 \div 6 =$

$10) -72 \div (-6) =$

$20) 84 \div (-7) =$

Dividing integers

Grade 5 Integers Worksheet

Rule:

The quotient of two numbers with same signs is a positive number.

The quotient of two numbers with different signs is a negative number.

Answers:

$$1) -18 \div 2 = -9$$

$$11) -210 \div 6 = -35$$

$$2) -72 \div 12 = -6$$

$$12) -144 \div 12 = -12$$

$$3) -220 \div 20 = -11$$

$$13) 92 \div 2 = 46$$

$$4) 120 \div (-20) = -6$$

$$14) 190 \div (-10) = -19$$

$$5) -45 \div (-15) = 3$$

$$15) 133 \div 19 = 7$$

$$6) -96 \div 16 = -6$$

$$16) 42 \div (-3) = -14$$

$$7) -180 \div (-9) = 20$$

$$17) 171 \div 1 = 171$$

$$8) 112 \div 7 = 16$$

$$18) 112 \div (-16) = -7$$

$$9) 209 \div (-19) = -11$$

$$19) -36 \div 6 = -6$$

$$10) -72 \div (-6) = 12$$

$$20) 84 \div (-7) = -12$$
